Rabat, Morocco
Born 28 December 2005
Moroccan nationality

Profile

Computer engineering student specializing in cybersecurity, with experience in Royal Air Maroc’s information security team. I combine governance, risk and compliance (DNSSI, ISO 27001/27002, NIST CSF and GDPR) with secure full-stack development and web penetration testing. I designed a multi-user DNSSI audit platform and produced vulnerability assessments with actionable remediation guidance.

Experience

Cybersecurity Intern — GRC & Application Security Jun 2026 – Aug 2026
Royal Air Maroc (RAM) — Information Systems Department
Built DNSSI compliance tools, applied security frameworks, conducted authorized penetration tests in a lab environment, and produced audit and remediation reports.

Education

Computer Engineering Degree — Engineering Cycle Sep 2025 – Jun 2028
UM6P College of Computing *Rabat Campus*
Computer Engineering Degree — Integrated Preparatory Cycle Sep 2023 – Jun 2025
UM6P College of Computing *Benquerir Campus*
Baccalaureate in Mathematics and Science Sep 2021 – May 2022
Lycée André Gide *Oujda*

Awards

3rd place — PwC x ACC Consulting Case Game (Digital Transformation). Developed a five-year digital roadmap for a Moroccan renewable-energy operator covering data governance, cybersecurity, IoT, edge computing, AI and change management.
2nd place — Capture The Flag (CTF), 1337 x Elitesec. Solved advanced challenges in system exploitation, cryptography and digital forensics.

Projects

LEAP — Project Monitoring and Analytics Platform, developed for OCP Solutions
Full-stack web platform integrated with GitHub and Jira to collect engineering activity. An LLM classifies code-review comment severity, while a scoring engine generates quality indicators, alerts and automated reports. *Stack: FastAPI, Python, relational database, modern frontend and secure authentication.*
DNSSI Audit and Self-Assessment Platform — Royal Air Maroc
Full-stack application for managing audit campaigns across 14 chapters, 31 objectives and 104 controls, with maturity scoring, compliance summaries, gap tracking, chapter-level assignments, and CSV/Excel/PDF exports. Secured with administrator/assessor roles, revocable `HttpOnly` sessions, CSRF protection, bcrypt and server-side access controls. *Stack: Next.js 16, React 19, TypeScript, Tailwind CSS 4, FastAPI, SQLAlchemy, SQLite/PostgreSQL.*

Technical Skills

GRC & audit: DNSSI, ISO/IEC 27001/27002, NIST CSF 2.0, GDPR, compliance auditing, risk analysis, OWASP Top 10, reporting.
Offensive security: Burp Suite, Nmap, Hashcat, Metasploit, Gobuster, sqlmap, mitmproxy.
Development & data: Python, TypeScript, JavaScript, C/C++, Java, SQL, FastAPI, React, Next.js, REST APIs, Tailwind CSS, PostgreSQL, SQLite, Git/GitHub, Linux, Docker.

Languages

English — Professional | French — Fluent | Arabic — Native

Core Strengths

Analytical thinking, rigor, autonomy, clear communication, teamwork, fast learning, professional ethics and a results-oriented mindset.
