Online portfolio

Rabat, Morocco

Born 28 December 2005

Moroccan nationality

Profile

Computer engineering student specializing in cybersecurity, with experience in Royal Air Maroc's information security team. I combine governance, risk and compliance (DNSSI, ISO 27001/27002, NIST CSF and GDPR) with secure full-stack development, web penetration testing, and responsible AI automation. I design operational systems with clear trust boundaries and reviewable evidence.

Experience

Cybersecurity Intern | GRC & Application Security

Jun 2026 – Aug 2026

Royal Air Maroc (RAM), Information Systems Department

Built DNSSI compliance tools, applied security frameworks, conducted authorized penetration tests in an isolated lab environment, and produced audit and remediation reports.

Education

Computer Engineering Degree | Engineering Cycle

Sep 2025 – Jun 2028

UM6P College of Computing

Rabat Campus

Computer Engineering Degree | Integrated Preparatory Cycle

Sep 2023 – Jun 2025

UM6P College of Computing

Benguerir Campus

Baccalaureate in Mathematics and Science

Sep 2021 – May 2022

Lycée André Gide

Oujda

Awards

3rd place | PwC x ACC Consulting Case Game (Digital Transformation). Developed a five-year roadmap for a Moroccan renewable-energy operator covering data governance, cybersecurity, IoT, edge computing, AI and change management.

2nd place | Capture The Flag (CTF), 1337 x Elitesec. Solved advanced challenges in system exploitation, cryptography and digital forensics.

Professional Development

Claude Cowork Automation | Claude Academy

15 Sep 2026

Introduction to Claude Cowork | Course completion badge

Configured Claude Cowork to automate operational tasks including scheduling emails and calendar appointments, while reviewing connector permissions and applying least-privilege access to reduce unnecessary exposure of sensitive organisational data.

Projects

LEAP | Project Monitoring and Analytics Platform, developed for OCP Solutions. Full-stack platform integrated with GitHub and Jira. An LLM classifies code-review comment severity; a scoring engine generates quality indicators, alerts and automated reports. Stack: FastAPI, Python, relational database, modern frontend and secure authentication.

DNSSI Audit and Self-Assessment Platform | Royal Air Maroc. Multi-user application covering 14 chapters, 31 objectives and 104 controls, with maturity scoring, gap tracking, chapter assignments, and CSV/Excel/PDF exports. Security includes administrator/assessor roles, revocable HttpOnly sessions, CSRF protection, bcrypt and server-side access controls. Stack: Next.js 16, React 19, TypeScript, Tailwind CSS 4, FastAPI, SQLAlchemy and SQLite/PostgreSQL.

Technical Skills

GRC & audit: DNSSI, ISO/IEC 27001/27002, NIST CSF 2.0, GDPR, compliance auditing, risk analysis, OWASP Top 10, reporting.

Offensive security: Burp Suite, Nmap, Hashcat, Metasploit, Gobuster, sqlmap, mitmproxy.

Development & data: Python, TypeScript, JavaScript, C/C++, Java, SQL, FastAPI, React, Next.js, REST APIs, Tailwind CSS, PostgreSQL, SQLite, Git/GitHub, Linux, Docker.

Languages & Core Strengths

Languages: English (professional), French (fluent), Arabic (native). **Strengths:** Analytical thinking, rigor, autonomy, clear communication, teamwork, fast learning, professional ethics and a results-oriented mindset.
